Local address in South Africa (SA nationals please provide institutional address)			
Local contact telephone / cell phone number (Foreign nationals only)			
Date on which you plan to commence the work			
Date on which you expect to complete the work			

Collaborator's names and email (e.g. collaborators on publication, supervisors, advisors etc.)

Applicant's qualifications		
Institution	Degree	Date Awarded

Title of Study

Purpose of Study (Publication, Thesis, etc.)

Nature of the Study: *A detailed research protocol must accompany this application, setting out in detail the sample required (temporal period, geographical region, cultural association based on the archaeology, where known); the purpose and nature of the work followed by clear aims and objectives; a comprehensive section on methodology setting out the techniques or procedures that will be used, and whether or not these may pose any threat to the remains.*

Do you intend to photograph any of the remains?	
If so, for what purpose?	

Do you intend to capture any three-dimensional data of any of the remains?	
If so, for what purpose?	

Are your analytic procedures destructive in nature?	
If so, for what purpose?	

Have you obtained permission from Provincial and South African Heritage Resources Agencies to do destructive analyses?	
If so, please provide the relevant permit number(s)	
Will the skeletal samples be analysed outside of SA?	
If so, please provide the relevant export permit number(s)	

Permits for destructive analysis and temporary/permanent export of skeletal samples: *Please note that archaeological human remains are regarded as part of South Africa's national heritage and are therefore protected by the National Heritage Resources Act 25 of 1999. For any destructive analyses or permanent export of samples prior permission must be obtained from the South African Heritages Resources Agency in the form of a permit. In addition to these permits written permission should also be obtained from any affected communities or living descendants of the individuals to be assessed, should this be known. N.B. please note that it is the researcher's responsibility to obtain the necessary permits and permission letters. Final approval of the research application can only be given once the curator has received said documentation.*
